

Public Records Distribution Policy and Associated Fees

The St. Johns River Water Management District's Governing Board voted Feb. 8, 2005, to revise its 15-year-old policy on handling public records requests and transferred authority to the District's executive director to establish fees and service charges and to make updates administratively as needed.

Florida public records law sets maximum fees that the District can recoup for duplicating certain types of records in response to public records requests, such as the specific cost for copies on legal- or letter-sized paper. Otherwise, the District must charge the actual cost of duplication but may also set special service charges for labor costs or extensive use of information technology.

Below are excerpts from District Administrative Directive 2005-01 on public records availability and duplication:

Actual Cost of Duplication

- The District shall furnish copies of public records upon receipt of payment of the actual cost of duplication or as otherwise provided in chapter 119, Florida Statutes. Charges for the duplication of public records shall be made pursuant to the following schedule:

This charge shall be based on the cost incurred by or attributable to the District for the extensive use of information technology resources or the labor cost of the personnel, or both, in providing the service.

- The special service charge shall be estimated at the time of the request and computed to the nearest quarter of an hour exceeding 30 minutes.
